

MEDICO-LEGAL CASE REPORT

Case: FIR/2024/DL/PSRKP/0452

Date: 13-08-2026

MEDICAL REPORT

Hospital: St. Stephen's Hospital, Tis Hazari, Delhi - 110054

Mlc Number: MLC/SSH/2024/5642

Date Of Admission: 2024-10-15

Time Of Admission: 18:45

Mode Of Arrival: Ambulance, accompanied by PCR Staff

PATIENT DETAILS

Name: Rajesh Kumar Sharma

Age: 42

Gender: Male

Blood Group: B+

Address: B-143, R.P. Bagh, Pusa Road, New Delhi - 110005

Brought By: HC Ramesh, PCR Van Z-45

ATTENDING DOCTOR

Name: Dr. Anjali Mehta

Qualification: MBBS, MS (Orthopedics)

Designation: Senior Resident, Emergency Department

Registration Number: DMC/R/2010/45678

CLINICAL HISTORY

Alleged History: Road Traffic Accident at Shankar Road T-Point at approximately 18:20 hours. Patient riding scooter, hit by speeding motorcycle from side. Thrown off vehicle and landed on road. Helmet worn at time of accident.

Brought Dead: False

Condition On Arrival: Conscious but disoriented, GCS 13/15 (E3 V4 M6), in severe pain, bleeding from scalp wound

VITAL SIGNS ON ARRIVAL

Blood Pressure: 100/70 mmHg

Pulse: 112/min

Respiratory Rate: 24/min

Temperature: 98.4°F

Spo2: 94% on room air

Pain Score: 9/10

INJURIES NOTED

Item 1:

Injury Id: INJ-001

Type: Laceration

Location: Scalp, right parietal region

Size: 6cm x 2cm x 1cm deep

Description: Irregular wound with active bleeding, visible periosteum, no skull bone visible

Cause: Impact with road surface

Item 2:

Injury Id: INJ-002

Type: Abrasion

Location: Face, right cheek and forehead

Size: Multiple, covering 12cm x 8cm area

Description: Road rash, dirt and debris embedded in wounds

Cause: Sliding on road surface

Item 3:

Injury Id: INJ-003

Type: Closed fracture

Location: Right femur, mid-shaft

Description: Deformity of right thigh, swelling, abnormal mobility, crepitus present. X-ray confirmed comminuted fracture mid-shaft femur with displacement.

Cause: Direct impact from vehicle collision

Item 4:

Injury Id: INJ-004

Type: Fracture

Location: Right clavicle, middle third

Description: Tenderness and deformity over right clavicle. X-ray confirmed displaced fracture.

Cause: Fall on right shoulder

Item 5:

Injury Id: INJ-005

Type: Fractures

Location: Ribs 3rd, 4th, 5th on right side, anterior

Description: Chest X-ray shows fractures of right 3rd, 4th, 5th ribs anteriorly. No flail segment. Lung fields clear.

Cause: Impact trauma

Item 6:

Injury Id: INJ-006

Type: Abrasion

Location: Right forearm and elbow

Size: 15cm x 6cm

Description: Deep abrasion, oozing

Cause: Road contact

Item 7:

Injury Id: INJ-007

Type: Abrasion

Location: Left knee

Size: 5cm x 4cm

Description: Superficial abrasion

Cause: Road contact

RADIOLOGICAL INVESTIGATIONS

Item 1:

Test: X-Ray Skull AP and Lateral

Finding: No skull fracture. Normal study.

Item 2:

Test: X-Ray Right Femur AP and Lateral

Finding: Comminuted fracture mid-shaft right femur. 2.5cm shortening. Angulation present.

Item 3:

Test: X-Ray Right Clavicle

Finding: Displaced fracture middle third right clavicle.

Item 4:

Test: X-Ray Chest PA

Finding: Fracture right 3rd, 4th, 5th ribs anteriorly. No pneumothorax or hemothorax. Lung fields clear.

Item 5:

Test: CT Scan Head (Plain)

Finding: Small subdural hematoma right fronto-parietal region (8mm thickness, 3cm x 4cm). Midline shift 4mm to left. No mass effect. Basal cisterns patent.

Item 6:

Test: FAST Ultrasound Abdomen

Finding: Grade II liver laceration right lobe (3cm x 2cm). No free fluid in Morrison's pouch, splenorenal recess, or pelvis. Other organs normal.

LABORATORY INVESTIGATIONS

Hemoglobin: 10.2 gm/dL

Tlc: 12000/cumm

Platelets: 2.4 lakhs/cumm

Blood Sugar: 130 mg/dL (Random)

Blood Urea: 32 mg/dL

Serum Creatinine: 0.9 mg/dL

Liver Function: Normal

Hiv Hbsag Hcv: Negative

Blood Alcohol Level: Nil (0 mg/dL)

Toxicology Screen: Negative for common drugs of abuse

DIAGNOSIS

Primary: Polytrauma following Road Traffic Accident

DETAILED

Item 1:

Traumatic Brain Injury - Small acute subdural hematoma right side with mild midline shift

Item 2:

Comminuted fracture shaft right femur

Item 3:

Displaced fracture right clavicle

Item 4:

Fracture right ribs 3, 4, 5 anterior

Item 5:

Grade II liver laceration

Item 6:

Multiple abrasions face and limbs

Item 7:

Scalp laceration right parietal region

TREATMENT GIVEN

EMERGENCY

Item 1:

Primary survey and resuscitation per ATLS protocol

Item 2:

Scalp wound suturing (6 stitches) under local anesthesia

Item 3:

IV fluids - 2 liters Ringer Lactate

Item 4:

IV Antibiotics - Ceftriaxone 2gm stat

Item 5:

IV Analgesic - Tramadol 100mg slow IV

Item 6:

Tetanus Toxoid 0.5ml IM

Item 7:

Right lower limb Thomas splint applied for femur fracture

Item 8:

Right arm sling for clavicle fracture

Item 9:

Wound debridement and dressing for abrasions

Admission: Admitted to Surgical ICU for observation and further management

SPECIALTY REFERRALS

Item 1:

Orthopedics - For femur and clavicle fracture management

Item 2:

Neurosurgery - For SDH monitoring

Item 3:

General Surgery - For liver laceration conservative management

DOCTOR OPINION

Nature Of Injuries: Grievous

Danger To Life: Yes, at time of admission due to head injury and potential for deterioration

Weapon Used: Not applicable - Injuries due to road traffic accident

Alcohol Intoxication: Not detected

Consistency With Alleged History: Injuries are consistent with high-velocity side impact from motorcycle and subsequent fall on road. Pattern of injuries matches described mechanism.

Duration Of Hospitalization: Expected 3-4 weeks minimum

Permanent Disability Likely: Possible - Right lower limb may have residual shortening/limitation
